

## Harness the accounting power of Microsoft Dynamics™ GP with Ability Financials, then use it to automatically and instantly analyze data from your Order Management System - ANY Order Management System!

### Start with Scalable, Affordable Accounting

Microsoft Dynamics™ GP offers a fully mature financial, analytics and business management system that unifies data across your business. Just think: if you could leverage the power of Microsoft Dynamics™ GP to perform advanced financial analysis, in real time, on your current order management data, you'd have real integration between your order management and corporate financial systems. Integration of those systems is the key to managing your customer relationships, increasing sales, and keeping your business healthy.

### Maintain Your Software

Our team has many years combined experience developing and supporting integration solutions for direct marketers. As a Microsoft Certified Gold Partner, our expertise helps you make the most of your Microsoft Dynamics™ GP investment. Our many satisfied customers have come to expect individualized user assistance, personalized implementation plans and educational user conferences - the quality support Ability Commerce delivers.

### Integrate with Ability Financials™ from Ability Commerce

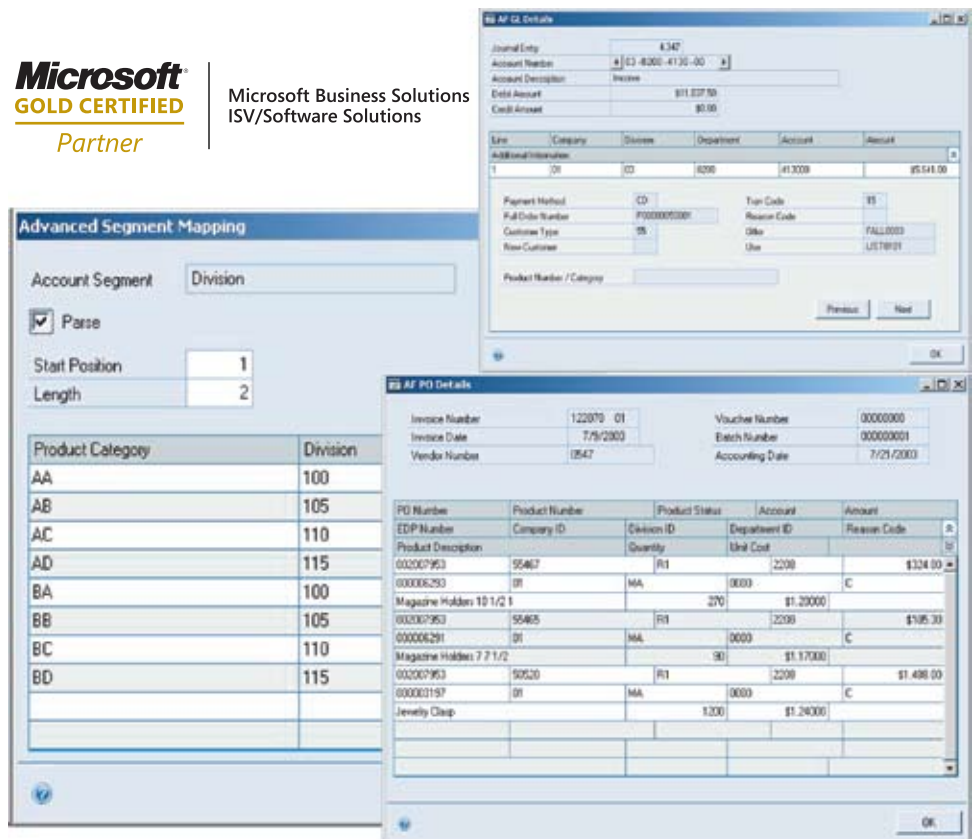

Ability Commerce, an independent software vendor with years of expertise in catalog and web marketing, has developed the world's only Microsoft - certified software specifically designed to meet the integrated reporting needs of multi-channel retailers.

This out-of-the-box integration software automatically interfaces data from your existing order management system with Microsoft Dynamics™ GP. No more waiting for time-consuming manual data entry. No more errors or inaccurate information - Ability Financials updates Microsoft Dynamics™ GP general ledger and payables directly from order management system data files.

Ability Financials is a fully supported, documented, and tested integration solution - no painstaking work for your IT people to create and keep up with an expensive hybrid system. Ability Financials works with any order management system, so you can keep the system you already trust to fulfill your orders and gain the accounting power you need that most order management systems lack.
